

# Septuvo

SECURITY WITHOUT COMPROMISE

## BRAND IDENTITY AND ASSET GUIDELINES

Brand kit release | October 2026

Official visual identity, logos, icons and design tokens.

# Identity and positioning

One ecosystem with four precisely defined products.

## The Septuvo brand

An independent secure-networking project.

Rust-first networking protocol and VPN software family.

Security-first design, clear connection status, and owner control.

---

### Septuvo

Primary brand

### Septuvo VPN

Consumer and business client

### Septuvo Protocol (SVP)

Independent wire protocol

### Septuvo Server

Self-hosted and gateway product

# Logo system

Use the metallic-blue mark on uncluttered high-contrast backgrounds.

**Dark background**

**Light background**

Use symbol-only marks for small controls and app icons.

Avoid stretching, redrawing, or placing the logo against busy imagery.

# Color palette

Official color palette for consistent brand and product design.

**Primary Blue**
#0066FF

**Electric Cyan**
#00D5F8

**Accent Teal**
#00E5B8

**Accent Purple**
#A855F7

**Midnight**
#050A14

**Navy**
#0B1220

**Surface**
#1E293B

**Muted Text**
#94A3B8

# Typography and hierarchy

Inter for UI, headings, documentation and supporting brand text.

Septuvo

## Security Without Compromise.

Designed for clarity on desktop, web, server and mobile.

---

**Display: 32-44 px**

**Heading: 20-28 px**

Body: 14-16 px

Labels: 12-13 px

No font files are redistributed in this archive.

# Product family

One consistent S. Distinct product accents.

## Septuvo VPN

Desktop and mobile VPN software

## Septuvo Protocol / SVP

Independent networking protocol

## Septuvo Server

Self-hosted and commercial gateway

# App icons and favicon system

Scale testing matters more than decorative effects.

512 px

256 px

128 px

64 px

32 px

16 px

Use the supplied 16, 24 and 32 px assets for compact interfaces.

Use clear, high-contrast marks wherever fine ribbon detail is lost.

# Do and do not

Protect recognition, contrast and sensible security messaging.

## DO

- Use consistent approved lockups
- Keep generous clear space
- Verify contrast and legibility
- Choose accurate connection wording
- Retain natural proportions

## DO NOT

- Stretch, rotate or recolor at random
- Use busy backgrounds behind text
- Treat adapter-up as VPN-authenticated
- Claim independently audited security
- Place trademark (TM) unless cleared

# Asset directory

Production-ready identity files organized for digital and print use.

| | |
|---|---|
| **Reference boards** | Visual standards for logos, typography, colors and application |
| **Transparent logos** | Primary marks, wordmarks and standalone S symbols |
| **Vector assets** | SVG outlines and scalable ribbon-symbol interpretations |
