The Septuvo identity

Security Without Compromise.

Approved visual hierarchy

- Metallic S emblem
- Metallic wordmark
- Consistent tagline spacing
- Balanced proportions
- Recognizable at every scale

BRAND

Septuvo | Septuvo VPN | Septuvo Protocol (SVP) | Septuvo Server

Use the supplied Septuvo artwork as the reference for a consistent brand identity.

Official logo system

Primary, horizontal and vertical variations share consistent spacing.

Primary / dark

Horizontal / dark

Vertical / dark

Primary / light

The Septuvo product family

Shared emblem and typography with distinct product color accents.

Septuvo VPN

Septuvo Protocol / SVP

Septuvo Server

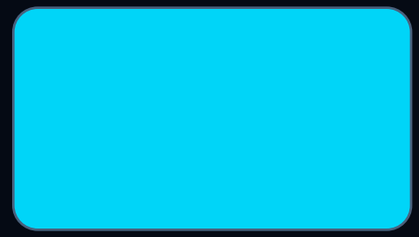

VPN: consumer and business VPN software
Protocol: independent wire protocol
Server: self-hosted gateway software

Brand color system

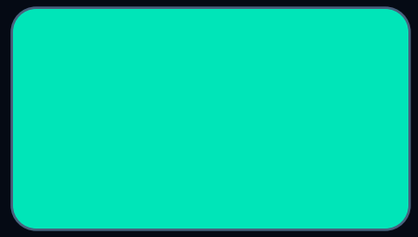

Use the canonical published UI tokens; metallic reflections are illustrative.

Primary blue
#0066FF

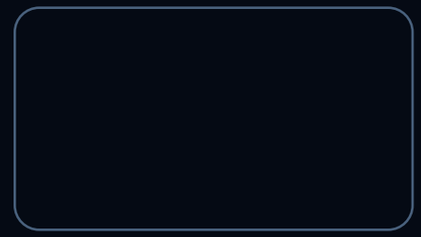

Electric cyan
#00D5F8

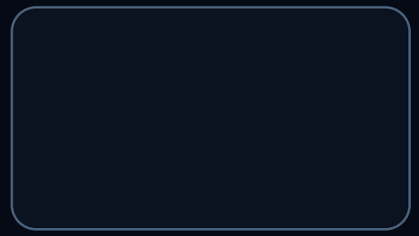

Teal
#00E5B8

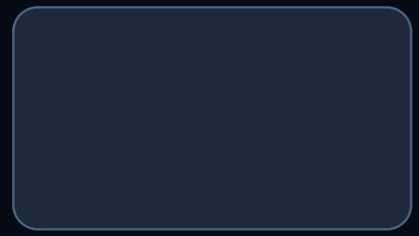

Purple
#A855F7

Midnight
#050A14

Navy
#0B1220

Surface
#1E293B

Muted
#94A3B8

White
#F8FAFC

Use the published color tokens consistently across digital interfaces and artwork.
Verify sufficient contrast and readability for each background treatment.

Typography & wordmark

Inter is the supporting UI typeface; the Septuvo wordmark is dedicated artwork.

INTER

User interface and documents

Regular: body copy / 14-16 px

Medium: navigation and labels

SemiBold: section headers

Bold: emphasis and hero text

Avoid substituting ordinary Inter text for the illustrated Septuvo wordmark.

Social media assets

Official graphics for social media and digital presentation.

Social share / 1200 x 630

Square graphic / 1080 x 1080

The layout should retain negative space around the wordmark and tagline.
Keep graphics focused on the brand, with ample clear space around the logo.

Desktop and header treatments

Use approved mountain and gradient imagery without covering the logo or tagline.

1920 x 1080 wallpaper | 3840 x 2160 high-resolution variant also included in brand/

For narrow header/banner applications, select the supplied native aspect ratio.
Never stretch, crop away the emblem, or let atmospheric artwork reduce legibility.

Usage rules

The same spacing and background contrast standards apply everywhere.

Light lettering on dark

Dark lettering on light

Maintain consistent clear space between the wordmark and tagline.

Respect the original proportions, approved colors and realistic minimum display sizes.

Treat the PNG masters as the visual reference; SVGs are scalable interpretations.

Do and do not

Protect recognition, contrast and accurate security messaging.

DO

- Use the approved lockups and artwork as supplied
- Keep generous clear space around every logo
- Verify contrast and legibility on every background
- Choose accurate connection wording: adapter active, peer authenticated, data reachable and DNS working are separate states
- Keep natural proportions at every size

DO NOT

- Stretch, rotate or randomly recolor the logo
- Place text over busy backgrounds
- Present an active network adapter as an authenticated VPN connection
- Claim an independent security audit or certification without evidence
- Use ™ or ® symbols before trademark rights are cleared

Asset selection & verification

Use actual brand/ files in the repository. Preserve the approved identity.

Full-color logos	brand/02 - Logos/PNG_Transparent/
Scalable logos	brand/02 - Logos/SVG_Vector_Interpretations/
